

ABOUT OUR COMPANY:

Ned Clyde Construction, Inc. has over 50 employees offering the full range of disciplines and experience to perform all the major and minor functions relevant to soil and foundation repair projects. Since our company is staffed by Geotechnical Engineers, Civil Engineers and Geologists, there is usually no need for outside consultants. Our greatest contribution comes through in-house management of a project from its inception to its completion -- we analyze the problem, develop the repair design and provide construction services. We typically run several field crews, each led by a knowledgeable, highly experienced Foreman.

REMEMBER:

Ned Clyde Construction, Inc. is a highly reputable engineering contractor specializing in soil-related problems such as landslides, retaining structures, drainage, erosion control, underpinning, and foundation corrective work. Since our founding in 1981, we have acquired an uncommon depth of experience and the invaluable skills, equipment and methods necessary to perform difficult jobs in a clean, professional manner.

**Ned Clyde
Construction,
Inc.**

OUR PAST

The late Ned Clyde, a well respected Civil and Geotechnical Engineer, was, in 1950,, a cofounder of Woodward Clyde Consultants, a major engineering firm with world-wide offices. In the 1960's, Mr. Clyde established a subsidiary construction firm known as Remmil Corporation. In 1981, this company became known as Ned Clyde Construction, Inc., an independent corporation.

TODAY

Ned Clyde Construction, Inc. is a company with a focus specializing in soil related problems, such as landslides, structural retaining walls, drainage, foundation corrective work, and environmental restoration. Throughout many years of continuous practice we have acquired an uncommon depth of experience and the invaluable skills, equipment and methods to perform the most difficult jobs in a clean and professional manner.

Ned Clyde Construction, Inc. offers an unusually high level of practical experience and a progressive approach to solving problems often found in soil and foundation repair projects.

Our firm, with a professional staff of engineers and geologists, truly has everything to solve your soil and foundation problems and more. We appreciate your business and recognize that as a customer you are most important to our continued success.

WHEN IT COMES TO SOIL AND FOUNDATION REPAIR PROJECTS NED CLYDE CONSTRUCTION, INC. CAN PROVIDE:

- **Consolidation of construction services to ease the design and building process of your project**
- **A design-build cost control formula to provide the best available value based on the most current price and performance information.**
- **Meeting your needs and handling your toughest problems in a cost effective manner.**
- **Using our outstanding design/build staff and our high level of practical experience will help you achieve your goals.**
- **A company whose employees pride themselves on their "can do" attitude that results in a successful project.**

"We found Ned Clyde Construction, Inc. to uphold to the highest standards in quality of work. We were totally satisfied and would not hesitate to recommend them to anyone that asks."

-- Jo Ann & Wayne, Danville CA

Retaining Walls

We engineer our walls to last. Many have been constructed successfully in areas with difficult access.

Underpinning and Releveling

Soils in the San Francisco Bay Area are often active, and structures founded on these soils are constantly shifting and settling. Our company utilizes proven, state-of-the-art techniques and procedures to underpin and re-support existing inadequate foundations.

Landslide Repair

Over the years we have repaired numerous slides and embankment failures. Earthwork can be expensive, and minor changes in a repair scheme can often mean substantial cost savings.
